

How many of you think...

...a \$2 Powerball ticket is a good investment?

What are your odds of winning?

- Powerball Grand Prize: About one in 175 million
- \$1 million Powerball Prize: About one in 5 million

So what does that mean?

- Let's find out...

You'll need a few items to get started...

An index card
A tape measure
A newspaper

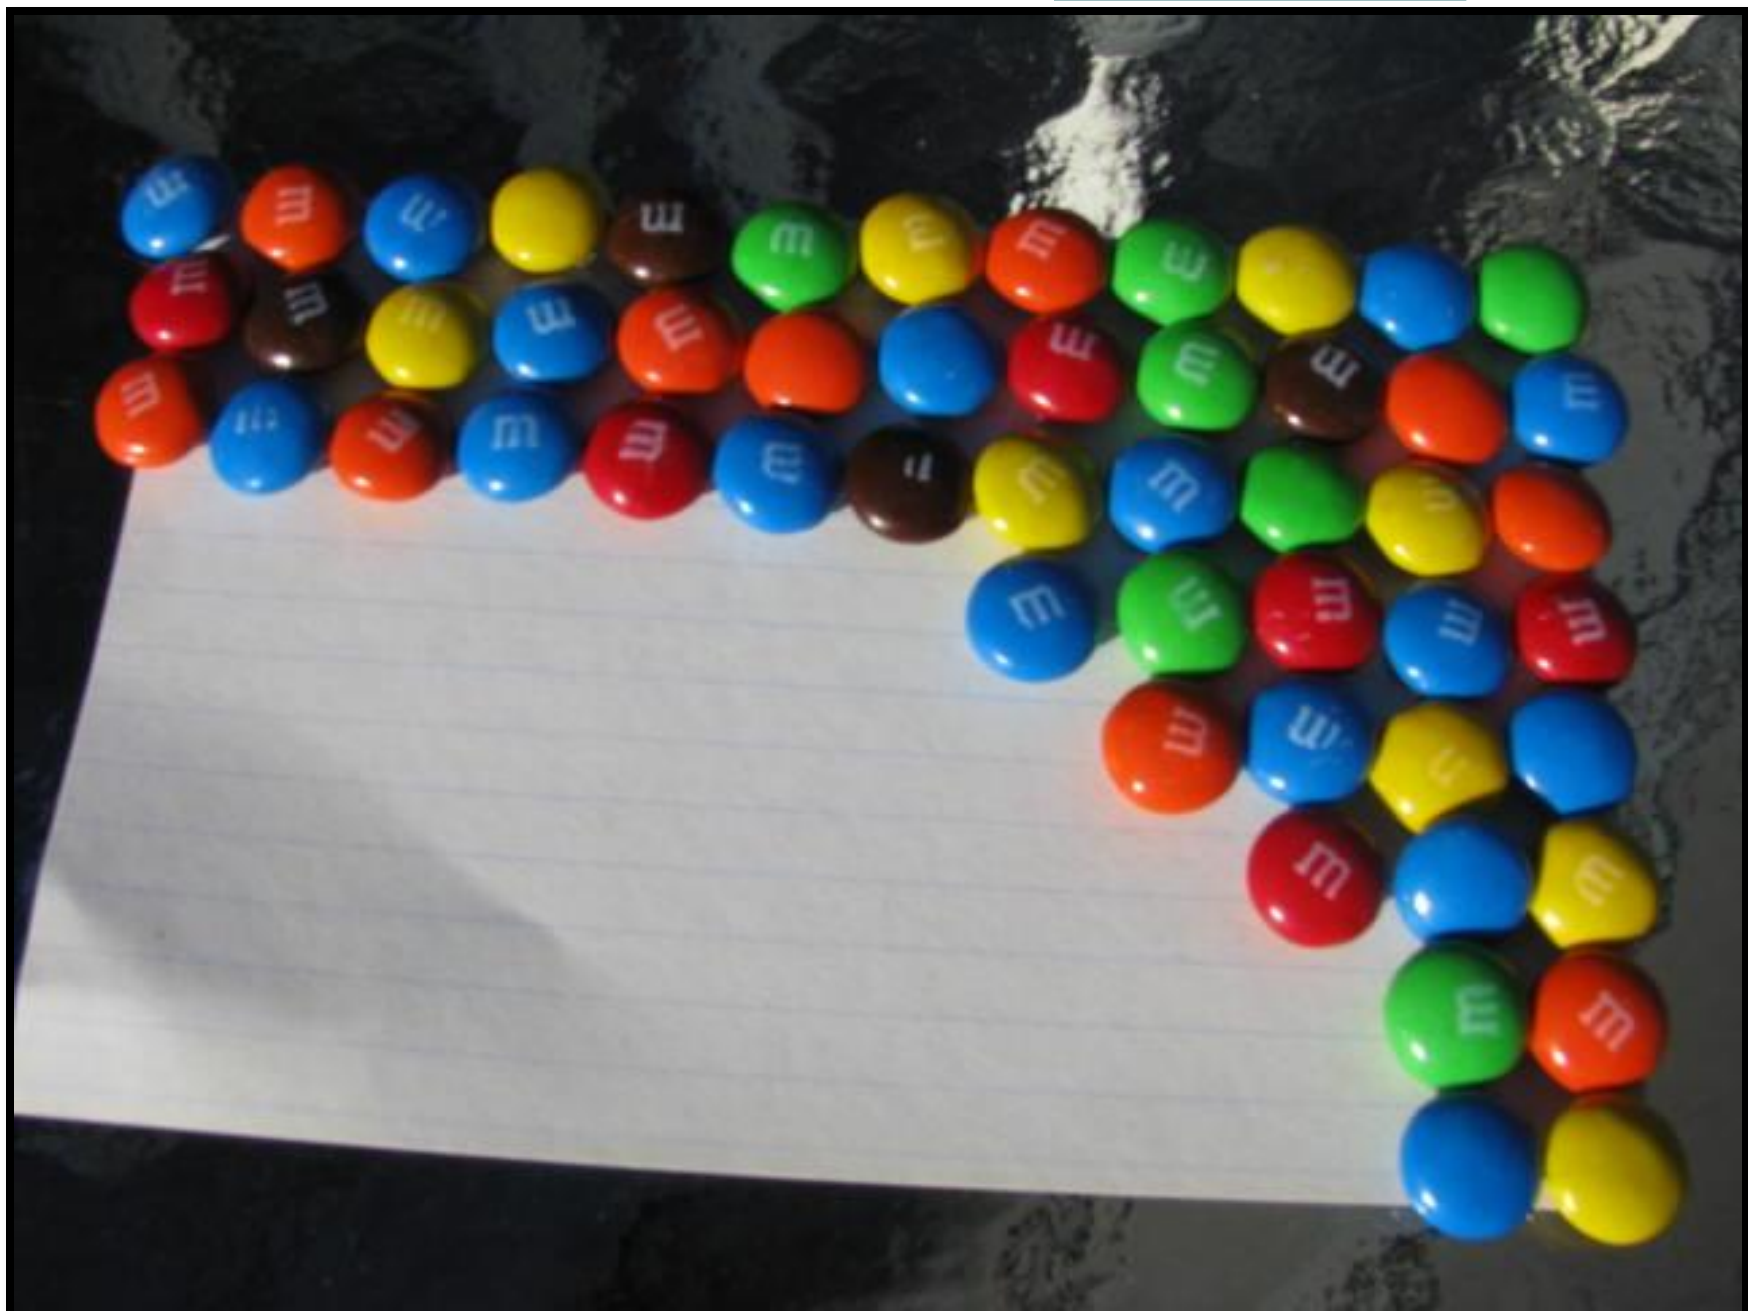

And some M & M's

How many M&M's can fit on a 3 x 5 index card?

Looks like 99 will do it...

Let's round to 100

How many 3x5 index cards fit on a newspaper?

How many newspapers fit on a basketball court?

About 1 million M&M's will cover a basketball court

What are your odds of winning?

- \$1 million Powerball Prize: About one in 5 million
- Like picking your M&M out of the 5 million covering five basketball courts

And the Powerball grand prize?

175 million M&M's would cover 175 basketball courts

So now what do you think?

Is a \$2 Powerball ticket still a good investment?
